

Content

A. General intensive care medicine	1
Nutrition _____	3
<i>Jan Wernerman</i>	
Sedation and analgesia in ICU _____	11
<i>R. Michael Grounds and Richard M. Venn</i>	
Acute abdominal crises in the critically ill patient: A primer for the non-surgeon _____	27
<i>John C. Marshall</i>	
Acute severe pancreatitis: Update on severity evaluation, prophylactic antibiotics and enteral nutrition _____	37
<i>Claudia P. Heidegger and Jacques-André Romand</i>	
Acute renal failure _____	43
<i>Michael Joannidis</i>	
From renal replacement therapy (RRT) to multiple organ support therapy (MOST) in critical illness _	55
<i>Anton Verbine, Dinna Cruz, Massimo De Cal, Federico Nalesso and Claudio Ronco</i>	
Coagulation disturbances in critically ill patients _____	67
<i>Claudia V.M. Teles</i>	
Catastrophes _____	83
<i>Charles D. Gomersall</i>	
B. Acute respiratory insufficiency and mechanical ventilation	91
The epidemiology of mechanical ventilation _____	93
<i>Andrés Esteban, Fernando Frutos-Vivar and Niall D. Ferguson</i>	
Principles of mechanical ventilation _____	101
<i>Christian Putensen</i>	
Acute respiratory distress syndrome: 25 years of progress and innovation _____	109
<i>Luciana Mascia, Marinella Zanierato and V. Marco Ranieri</i>	
Ventilator-associated pneumonia: The last 25 years _____	117
<i>Jordi Valles, Thiago Lisboa and Jordi Rello</i>	
From invasive to non-invasive ventilation in patients with COPD exacerbation _____	127
<i>Massimo Antonelli, Roberta Costa, Salvatore Maurizio Maggiore and Giorgio Conti</i>	

C. Sepsis and infection	139
Sepsis _____	141
<i>Herwig Gerlach</i>	
Epidemiology of severe sepsis _____	155
<i>Eliezer Silva and Derek C. Angus</i>	
Pathophysiology of septic shock _____	163
<i>Adrien Bouglé, Hélène Prigent, François Santoli and Djillali Annane</i>	
Antibiotics in the ICU _____	177
<i>Marc Leone and Claude Martin</i>	
Early goal-directed therapy in severe sepsis and septic shock _____	189
<i>Emanuel P. Rivers, Bryant Nguyen, Tiffany M. Osborn, David F. Gaieski, Munish Goyal, Kyle J. Gunnerson, Stephen Trzeciak, Robert Sherwin, Christopher V. Holthaus and Ronny Otero</i>	
Multidrug resistant infections in the ICU: Mechanisms, prevention and treatment _____	199
<i>Jean Carlet, Adel Ben Ali, Alexis Tabah, Vincent Willems, François Philippart, Annie Chalfine, Maité Garrouste-Orgeas and Benoit Misset</i>	
D. Cardiac problems in intensive care medicine	213
Acute coronary syndromes _____	215
<i>Elias Knobel, Antonio E. Pesaro, Marcelo Katz, Paolo Cesar G.D. Campos</i>	
Acute heart failure _____	231
<i>Miguel Tavares, Romain Pirracchio and Alexandre Mebazaa</i>	
Cardiac arrest _____	247
<i>Kees H. Polderman</i>	
E. Circulation	259
Shock _____	261
<i>Jean-Louis Vincent</i>	
Non-invasive haemodynamic monitoring _____	269
<i>Jan Poelaert and Carl Roosens</i>	
Haemodynamic monitoring using the pulmonary artery catheter _____	287
<i>Andrew Rhodes and Michael R. Pinsky</i>	
Assessing fluid responsiveness in mechanically ventilated patients _____	295
<i>Azriel Perel</i>	
Monitoring microcirculation: The next frontier? _____	301
<i>Daniel De Backer</i>	

F. Neurointensive care medicine	307
Acute non-traumatic coma _____	309
<i>Ricardo T. Costa da Silva and Peter J.D. Andrews</i>	
Brain trauma _____	317
<i>Nino Stocchetti and Luca Longhi</i>	
G. Health services research and outcomes	327
History of intensive care medicine in Europe: A few landmarks _____	329
<i>Peter M. Suter</i>	
The role of intensive care societies _____	333
<i>José Besso</i>	
Breaking the paradigm: The ICU without walls _____	337
<i>Ken Hillman</i>	
Organisation of intensive care _____	343
<i>Jukka Takala</i>	
Training in intensive care medicine _____	351
<i>Julian Bion, Hannah Reay and Alison Bullock</i>	
Nursing and allied health professionals in ESICM: 25 years of limited progress _____	359
<i>Sheila Adam</i>	
The history and lessons from investigation into the nature and causes of human error in the ICU ____	369
<i>Yoel Donchin, Yael Einav and Ido Morag</i>	
The role of information technology in the ICU _____	375
<i>Michael Reng</i>	
The patient care continuum: From the emergency department to the Intensive Care Unit _____	383
<i>Tiffany M. Osborn, Kumar Alagappan, Lillian L. Emlet, David T. Huang, C. Jim Holliman, Kinjal Sethuraman and Janice L. Zimmerman</i>	
Admission and discharge of the critically ill patient _____	393
<i>David R Goldhill</i>	
Performance evaluation in the ICU _____	399
<i>Herbert Vesely and Philipp G.H. Metnitz</i>	
Principles of risk-adjustment in the critically ill patient _____	409
<i>Rui P. Moreno, Ana Luísa Jardim, Ricardo Godinho de Matos and Philipp G.H. Metnitz</i>	
Long-term outcomes after intensive care _____	419
<i>Hans Flaatten</i>	

Health related quality of life after ICU discharge _____	429
<i>Maurizia Capuzzo, Philipp G.H. Metnitz and Rui P. Moreno</i>	
Cognitive impairment and critical illness: The immediate and long-term consequences _____	439
<i>Max L. Gunther, James C. Jackson and E. Wesley Ely</i>	
An alternative to refusing ICU admission of cancer patients _____	449
<i>Elie Azoulay, Nicolas Bele, Guillaume Thiery and Benoît Schlemmer</i>	
H. Ethics _____	461
Ethics _____	463
<i>François Lemaire</i>	
End-of-life care for patients in the Intensive Care Unit _____	469
<i>J. Randall Curtis</i>	
Communication with families of dying patients in the ICU _____	481
<i>Thomas Fassier and Elie Azoulay</i>
